Consolidated Management Report

Activity

The positive evolution of the demand in the Iberian Peninsula coupled with the effects of the openings during 2014 and the fact that the Easter holidays have occurred in the first quarter contributed to accelerate the business growth trend in this period.

The consolidated turnover amounted to EUR 47.3 million which compares with EUR 40.7 million in Q1 2014.

Group restaurant sales amounted to EUR 46.6 million, a growth of 16.0% as follows:

SALES IN RESTAURANTS	Million €	Ch.14/13
•		
Restaurants	15,49	5,2%
Counters	26,57	25,0%
Concessions &Catering	4,57	8,6%
Total Sales	46,63	16,0%

The highest ticket segment – Restaurants – recorded higher sales recovery difficulties. However, the growth recorded in the quarter is greater than 5%, very close to the estimated growth of the market and higher than what happened in 2014.

In the counters segment the brands that we operate maintained the trend observed last year with gains of market share, with main emphasis on the Burger King and KFC performance.

The "Catering and Concessions" business had a slightly above-market performance with sales growth above 8%.

During the quarter we closed four units in Portugal by decision of non-renewal of the rental agreements (Pizza Hut Figueira da Foz, O'kilo Antas DV and DV Coimbra and Pans Odivelas). The need to expand and modernize the Burger King restaurant in NorteShopping led to the decision of closing the Flor d'Oliveira unit that operated in the adjacent space. In Spain Pizza Móvil closed the Guadalajara operation.

Following the expansion strategy through "drive" units we completed two openings: a Burger King in the Lisbon area (Abóbada) and a KFC in Benguela Angola).

At the end of the quarter the Group operated 367equity restaurants, as shown below:

Results

The consolidated net income of the 1Q amounted to EUR 2.3 million, EUR 1.7 million more than what had been registered in Q1 2014.

The gross margin corresponds to 76.3% of turnover (Q1 2014: 75.7%) having recovered to 2013 levels.

The adjustment of costs to lower levels of activity carried out in the past two years results into a more flexible cost structure that generates significant leverage profitability whenever it is registered a turnover growth. In fact, there happened a dilution of the weight of the different fixed costs:

- Staff costs: increase of 12.2%, below the evolution of sales, representing 32.3% of the turnover (Q1 14: 33,3%). The permanent focus on management of the staff hours allowed to react efficiently to the changes in the sales;
- Supplies and services: increase of 12.5%, representing 32.3% of turnover, 1 pp less than in Q1 2014. With the continued control efforts and renegotiation of overheads carried on the recent years we managed to keep a few fixed costs.

A rise in the sales in a quarter in which the turnover is lower has amplified the impact on profitability translated in an EBITDA increase of EUR 1.9 million, amounting to EUR 5.81 million, ie 49.9% above Q1 2014.

The EBITDA margin stood at 12.3% of turnover when compared with 9.5% in Q1 2014.

The consolidated EBIT margin increased from 3.7% of turnover to 7.0%, corresponding to an operating profit of EUR 3.33 million.

Consolidated financial results were negative in EUR 149,000, about EUR 454,000 lower than Q1 14, an effect of the registration of favorable exchange differences on translation of financial assets of the Portuguese subsidiary in Angola as a consequence of the euro devaluation. Without this effect, but considering the devaluation of AKZ against the USD, the financial result stood at the level of Q1 2014.

The average cost of funds, which stood at 3.5%, was substantially lower than Q1 2014. Despite the increased weight of financing contracted in Angola, with interest rates much higher than the Group average, the reduction of the rates of the loans registered in the last twelve months had a much higher impact.

In the first quarter, the evolution of the EUR significantly influenced the financial results, a situation that can be reversed in the near future.

Financial Situation

Total Assets amounted to EUR 222 million and equity stood at EUR 129 million representing 58% of assets.

As is characteristic of this business, the current assets are lower than the current liabilities. The negative working capital stood at EUR 25 million but EUR 5 million below the end of last year figure.

The cash flow generated of EUR 4.8 million has fully financed the investment which amounted to EUR 3.6 million mainly directed to the expansion.

The net borrowings on March 31, 2015 amounted to EUR 29.3 million, EUR 4 million above the figure recorded at the end of 2014.

Own Shares

During the first quarter of 2015 there has not been registered transactions of own shares. On the 31st March the company held 2,000,000 own shares, representing 10% of the capital, for an amount of EUR 11,179,644, corresponding to an average price per share of EUR 5.59.

Outlook

In the second quarter we expect to maintain the sales trend that occurred in the first one. However, given the fact that in 2014 sales began to grow at higher rates following the beginning of the second half, it is foreseeable that may occur a slowdown in the growth rate that will be offset by the effect of opening new units. In terms of costs we do not anticipate major changes other than those related to the seasonality of the business.

The expansion plan in the Iberian market will materialize into the opening of 5 new units, keeping the purpose of continuing the plan of modernization and refurbishment of the existing units.

In Angola, the opening of the sixth unit should occur at the end of this month.

⁽¹⁾ intangible assets in progress balance refers mainly to the 3 new concessions yet to be open, in service areas of the following motorways: Guimarães, Fafe and Paredes. These service areas are still in the design stage and waiting for platforms delivery. It is expected that the platforms will not be delivered and their contracts cancel with the consequent repayment of principal invested.

Industrial property includes group's concessions and territorial rights.

Goodwill is broken down as shown bellow:

	<u> Mar-15</u>	Dec-14
Portugal	7.560.347	7.560.347

10. DIVIDENDS

At the General Meeting of 30th April 2015, the company decided to pay a gross dividend of 0,055 euros per share (0,055 euros in 2014), representing a total value of 990.000 euros for outstanding shares (990.000 euros in 2014). Payment is scheduled for May 29, 2015.

11. CONTINGENT ASSETS AND LIABILITIES

The group has contingent liabilities regarding bank and other guarantees and other contingencies related with its business operations (as licensing, advertising fees, food hygiene and safety and employees, and the rate of success of these processes is historically high in Ibersol). No significant liabilities are expected to arise from the said contingent liabilities.

On 31st March 2015 and 31st December 2014, responsibilities not recorded by the companies and included in the consolidation consist mainly of bank guarantees given on their behalf, as shown below:

	Mar-15	Dec-14
Guarantees given	106.344	117.339
Bank guarantees	1.842.494	1.884.411

On early October 2013, a joint administrative action against the Portuguese State, was brought by the subsidiary lberusa Hotelaria e Restauração, S.A., whose cause of action falls in extensive property damage caused by the current and future implementation of Iberusa signed contracts under the Public-Private Partnerships, concerning several highway concessions where Iberusa explores, in different service areas, several establishments, under the various sub-conceded contracts.

12. COMMITMENTS

No investments had been signed on the Balance Sheet date which had not taken place yet.

14. FINANCIAL RISK MANAGEMENT

14.532.802

14.1 Financial risk factors

The group's activities are exposed to a number of financial risk factors: market risk (including currency exchange risk, fair value risk associated to the interest rate and price risk), credit risk, liquidity risk and cash flow risks associated to the interest rate. The group maintains a risk management program that focuses its analysis on financial markets to minimise the potential adverse effects of those risks on the group's financial performance.

Financial risk management is headed by the Financial Department based on the policies approved by the Board of Directors. The treasury identifies, evaluates and employs financial risk hedging measures in close cooperation with the group's operating units. The Board provides principles for managing the risk as a whole and policies that cover specific areas, such as the currency exchange risk, the interest rate risk, the credit risk and the investment of surplus liquidity.

a) Market risk

i) Currency exchange risk

The currency exchange risk is very low, since the group operates mainly in the Iberian market. Bank loans are mainly in euros and acquisitions outside the Euro zone are of irrelevant proportions.

Although the Group holds investments outside the euro-zone in external operations, in Angola, due to the reduced size of the investment, there is no significant exposure to currency exchange risk. Angolan branch loans in the amount of 2.687.500 USD does not provide material exposure to currency exchange rate due to its reduced amount and to the strong correlation between USA dollar and local currency. The remaining loans are in local currency, the same as the revenues.

Currency exchange rate used for conversion of the transactions and balances denominated in Kwanzas, were respectively:

Mar-15

11141 10			
Euro exchange rates	(x	Rate on March, 31	Average interest
foreign currency per 1 Euro)		2015	rate March 2015
Kwanza de Angola (AOA)		117,055	115,260

Dec-14

Euro exchange rates	(x Rate on D	ecember, A	Average interest
foreign currency per 1 Euro)	31 2014	r	ate year 2014
Kwanza de Angola (AOA)		124,984	131,044

ii) Price risk

The group is not greatly exposed to the merchandise price risk.

iii) Interest rate risk (cash flow and fair value)

Since the group does not have remunerated assets earning significant interest, the profit and cash flow from investment activities are substantially independent from interest rate fluctuations.

The group's interest rate risk follows its liabilities, in particular long-term loans. Loans issued with variable rates expose the group to the cash flow risk associated to interest rates. Loans with fixed rates expose the group to the risk of the fair value associated to interest rates. At the current interest rates, in financing of longer maturity periods the group has a policy of totally or partially fixing the interest rates.

The unpaid debt bears variable interest rate, part of which has been the object of an interest rate swap. The interest rate swap to hedge the risk of a 10 million euros (commercial paper programmes) loan has the maturity of the underlying interest and the repayment plan identical to the terms of the loan.

Based on simulations performed on 31 March 2015, an increase of 100 basis points in the interest rate, maintaining other factors constant, would have a negative impact in the net profit of 50.000 euros.

b) Credit risk

The group's main activity covers sales paid in cash or by debit/credit cards. As such, the group does not have relevant credit risk concentrations. It has policies ensuring that sales on credit are performed to customers with a suitable credit history. The group has policies that limit the amount of credit to which these customers have access.

c) Liquidity risk

Liquidity risk management implies maintaining a sufficient amount of cash and bank deposits, the feasibility of consolidating the floating debt through a suitable amount of credit facilities and the capacity to liquidate market positions. Treasury needs are managed based on the annual plan that is reviewed every quarter and adjusted daily. Related with the dynamics of the underlying business operations, the group's treasury strives to maintain the floating debt flexible by maintaining credit lines available.

The Group considers that the short-term bank loans are due on the renewal date and that the commercial paper programmes matured on the dates of denunciation.

At the end of the year, current liabilities reached 59 million euros, compared with 29 million euros in current assets. This disequilibrium is, on one hand, a financial characteristic of this business and, on the other hand, due to the use of commercial paper programmes in witch the Group considers the maturity date as the renewal date, regardless of its initial stated periods. In order to ensure liquidity of the short term debt it is expected in the year 2015 the renewal of the commercial paper programmes (9.500.000 euros). However, in case of need, cash and cash equivalents and cash flows from operations are sufficient to settle current loans.

On recent developments, to lower bank loans the company opted to increase financial debt maturity and to maintain a significant share of the short term debt. On March 31, 2015, the use of short term liquidity cash flow support was of 2%. Investments in term deposits of 3 million match 13% of liabilities paid.

The following table shows the Group financial liabilities (relevant items), considering contractual cash-flows:

	_	to March 2016	from March 2016 to 2021
Bank loans and overdrafts		5.014.540	16.391.920
Commercial paper		10.750.000	8.750.000
Suppliers of fixed assets c/ a		4.106.825	-
Suppliers c/ a		16.659.470	-
Other creditors		9.423.626	261.349
Accrued costs		9.926.586	-
	Total	55.881.047	25.403.269

d) Capital risk

The company aims to maintain an equity level suitable to the characteristics of its main business (cash sales and credit from suppliers) and to ensure continuity and expansion. The capital structure balance is monitored based on the gearing ratio (defined as: net remunerated debt / net remunerated debt + equity) in order to place the ratio within a 35%-70% interval.

On 31st March 2015 the gearing ratio was of 19% and on 31st December 2014 of 17%, as follows:

	_	Mar-15	Dec-14
Bank loans		40.906.460	38.831.817
Cash and bank deposits	-	-11.644.609	-13.566.782
Net indebtedness		29.261.851	25.265.035
Equity	_	128.745.491	126.313.585
Total capital	_	158.007.342	151.578.620
	Gearing ratio	19%	17%

Given the current constraints of the financial markets and despite the goal of placing the gearing ratio in the range 35% -70%, prudently, in March 2015 we have a 19% ratio.

14.2 Estimated fair value

The fair value of financial instruments commercialised in active markets (such as publicly negotiated derivatives, securities for negotiation and available for sale) is determined based on the listed market prices on the consolidated statement of financial position date. The market price used for the group's financial assets is the price received by the shareholders in the current market. The market price for financial liabilities is the price to be paid in the current market.

The nominal value of accounts receivable (minus impairment adjustments) and accounts payable is assumed to be as approximate to its fair value. The fair value of financial liabilities is estimated by updating future cash flows contracted at the current market interest rate that is available for similar financial instruments.

15. OTHER CURRENT ASSETS AND LIABILITIES

16. SUBSEQUENT EVENTS

There were no subsequent events as of 31 March 2015 that may have a material impact on these financial statements.

17. APPROVAL OF THE FINANCIAL STATEMENTS

The financial statements were approved by the Board of Directors and authorised for emission on 18th May 2015.
