Consolidated Management Report

Activity

Consolidated turnover in the first half of 2018 amounted to EUR 211.3 million, compared to EUR 204.4 million in the same period of the previous year, broken down as follows:

Turnover	1st Half 2018			
Turnover	euro million	% Ch. 18/17		
Sales of Restaurants	203,91	1,6%		
Sales of Merchandise	4,99	300,3%		
Services Rendered	2,43	2,1%		
Net Sales & Services	211,32	3,4%		

The positive evolution of the demand in the Iberian - it is estimated a market increase by around 6% and 2% in Portugal and Spain respectively - coupled with the effects of the openings during 2017, contributed to the maintenance of the growth trend during this period.

This made, allowed to minimize the impact of an important turnover reduction in Angola, due to the devaluation of AKZ, which increased costs without having been reflected in the same sales price increase and, by the planned reduction in the number of restaurants that we stopped operating at the Barcelona airport since the beginning of May.

The activity of the second quarter was also marked by the general strike of the employees of the concessions, from called "Lote 22", at Barcelona Airport (against the division into smaller restaurants group, due to the entry of the new tender conditions carried out by the AENA concessionaire)

Despite these effects, consolidated restaurant sales still reached 203.9 million euros, representing a growth of 1.6%, compared to 200.7 million euros in the same period.

SALES IN RESTAURANTS	1st Half 20	18
SALES IN RESTAORANTS	euro million %	Ch. 18/17
Restaurants	47,70	3,9%
Counters	96,28	3,7%
Concessions&Catering	59,93	-3,3%
Total Sales	203,91	1,6%

Benefiting from a more favorable context, restaurants segment was the well performed one, with special highlight for Pizza Hut performance.

In the counters segment, the brands which we operate maintained the trend observed in the first quarter with market share gains and growth rates influenced by a higher number of units operating. Even including KFC's activity in Angola (which decreased by 29% in euros), this segment achieved a 3.7% growth of sales.

The "Concessions and Catering" segment sales decreased, compared to the same period of the previous year, resulting from the end of the concession, in May, of 14 restaurants in Barcelona Airport. In addition, a negative impact on sales, resulting from the general strike of "Lote 22" employees at Barcelona Airport in April, estimated in 2.5 million euros.

During the semester, 9 other units were closed in Spain, 8 of which franchises, continuing the process of the network readjustment.

In Portugal, the closures of two Pasta Caffé restaurants, a KFC restaurant and the Exponor unit occurred due to the end of the respective lease agreement.

Following the strategy of expansion we opened 2 franchised restaurants (Pans and Ribs) and 10 equity restaurants, one at Barajas airport in Madrid, three provisional points of sale, in the concession of Gran Canaria airport and one in the Barcelona airport. In addition, the opening of 4 new restaurants in Portugal (PH and KFC) and a Pans in Spain.

At the end of the semester, the total number of restaurants was 630 (493 equity and 137 franchises), as shown below:

The consolidated net income of 1H amounted to Eur 10.9 million euros. Excluding the effect of the application of IAS29, the net result would be 10 million euros, 0.3 million euros higher than the same period of 2017, which represents a growth of 3.1%.

Gross margin was 75.8% of turnover, 1.2p.p lower than the previous year. This reduction results from a higher weight of merchandise sales. Without this effect the gross margin was 76.9% (1H17: 77.0%) influenced by a reduction of 4p.p in Angola.

Including the effect of the increase in the minimum wage, **Staff costs** increased 2.1%, representing 31.3% of the turnover (1H17: 31.7%). There were no increases resulting from the updating of the salary scales applicable to the sector in Portugal, which could be applied retroactively.

External Supplies and services: increase of 1.7%, representing 33.5% of turnover,0.6 pp less than in 1H 2017, despite the rents increase in new airport concessions.

Other operating income amounted to 4.5 million euros, which represents a reduction of around 0.4 million, resulting from the non-recurring income generated by the loss of a restaurant in the same period of the previous year.

Other operating costs amounted to 1 million euros, of which 0.5 million in fees and taxes.

Therefore **EBITDA** amounted to 26.5 million euros, an increase of 3.3% over 1H17, strongly influenced by the activity in Angola, deeply affected by the devaluation of AKZ, about 53%, only reflected in 15% in sales price.

Consolidated **EBITDA** margin stood at 12.5% of turnover at the same level as the first half of 2017 (12.6%).

Consolidated **EBIT** margin increased from 5.7% of turnover in 1H17 to 6.7% in the 1H18, corresponding to an operating result of 14.1 million euros. To this result contributed a reduction in the value of depreciation, which represents 5.9% of turnover (6.9% in the first half of 2017). This reduction mainly results from the extension of the operation at the Barcelona airport for a period after the final data of the concession agreement in December 2017.

Consolidated **Net Financing cost** were 2.2 million euros, around 0.2 million euros lower than 1H17. However it should be noted that in the first half of 2018 this item includes around 0.9 million euros corresponding to the account of the discounted value of the collateral provided in Spain, namely those required by the signed agreements into for the new concessions.

Average cost of loans, which stood at 2.2%, substantially lower than 1H17 (2.5%), due to the dilution of the weight of the debt in Angola.

The **income tax** for the period amounts to 1.5 million euros, which represents an effective rate of 12%, lower than the nominal rate, mainly due to the tax benefits of 1.6 million euros, under of the Investment Tax Code (CFI).

Financial Situation

Total Assets amounted to 432 million euros and equity stood at 192 million euros, representing 44% of assets.

CAPEX reached 12.4 million euros. About 8.7 million euros for the investment incurred in new restaurant openings and works in progress, the remainder for the refurbishment and reconversion of some restaurants.

Net debt at 30th June 2018 amounted to 78.5 million euros, 4.6 milion euros lower than at the end of 2017.

Treasury Stock

By resolution of the General Shareholders Meeting held on 14th May 2018, the share capital increased from 30,000,000 to 36,000,000 euros through the incorporation of reserves. This operation was registered at the Commercial Registry of Oporto at 15th June 2018 and the allocation of the new shares took place last July.

During the first half of 2018 there has not been registered transactions of own shares. As a result of the capital increase, the company held 3,599,926 own shares, representing 9.9998% of the share capital, acquired by 11.179.969 euros, corresponding to an average price per share of Euro 3.11.

Risks and Uncertainties

In Angola, the steps taken to improve payments abroad did not translate into an improvement in the economy, which could lead to a consumption and sales decrease.

In Portugal, it is expected to slightly slow down the sales growth pace in line with what is has seen in recent months, while in Spain is expected to remain current but more moderate levels.

In Angola, the maintenance of AKZ's devaluation may lead to an increase in prices, which will probably result in a decrease in consumption with the inherent drop in transactions. The inability to increase prices at the pace of devaluation, will lead to a decrease in the profitability of our operations.

Following the contests won in the concessions in Spain, it is expected that the opening of 24 units will take place at the airports of Barcelona, Gran Canaria and Malaga until the end of 2018.

In terms of openings outside the concession areas, we will try to remain the rhythm of the expansion plans of recent years, with the opening of more than a dozen restaurants.

An agreement between Pizza Hut ans Telepizza was recently announced, under which Pizza Hut will assign the rights associated with a master franchise in the Iberian Peninsula and throughout Latin America and South America, exception Brazil. As result, Ibersol will become directly related to Telepizza and only indirectly to Pizza Hut.

Ibersol will manitain the operation of the existing restaurants on the contracted terms and will have to agree with Telepizza the future development of new locations and renewals of the contracts, when they occur.

As reported in the first quarter, the business is still dependent on approvals from different authorities. Despite this fact we are in negotiations with Telepizza to define the future relationship framework.

IBERSOL SGPS, S.A.

ANNEX TO THE CONSOLIDATED INTERIM FINANCIAL STATEMENTS

FOR THE SIX MONTHS PERIOD ENDED ON 30 JUNE 2018

(Values in euros)

1. INTRODUCTION

IBERSOL, SGPS, SA ("Company" or "Ibersol") has its head office at Praça do Bom Sucesso, Edifício Península n.⁹ 105 a 159 – 9°, 4150-146 Porto, Portugal. Ibersol's subsidiaries (jointly called the Group), operate a network of 630 units in the restaurant segment through the brands Pizza Hut, Pasta Caffé, Pans & Company, Ribs, FresCo, SantaMaria, Kentucky Fried Chicken, Burger King, O' Kilo, Roulotte, Quiosques, Pizza Móvil, Miit, Sol, Sugestões e Opções, Silva Carvalho Catering e Palace Catering, coffe counters and other concessions. The group has 493 units which it operates and 137 units under a franchise contract. Of this universe, 297 are headquartered in Spain, of which 168 are own establishments and 129 are franchised establishments, and 10 in Angola.

Ibersol is a public limited company listed on the Euronext of Lisbon.

Ibersol SGPS parent company is ATPS - SGPS, S.A..

2. MAIN ACCOUNTING POLICIES

The main accounting policies applied in preparing these consolidated financial statements are described below.

2.1 Presentation basis

These consolidated financial statements were prepared according to the international standard n^o. 34 – Interim Financial Report, and therefore do not include all the information required by the annual financial statements, and should be read together with the company's financial statements for the period ended 31 December 2017.

The consolidated financial statements have been prepared in accordance with the historical cost principle, changed to fair value in the case of derivative financial instruments.

The accounting policies applied on 30 June 2018 are identical to those applied for preparing the financial statements of 30 June and 31 December 2017, except for the exchange currency differences included in other income / other operating costs and excluded from net financing cost.

3. CHANGE OF ACCOUNTING POLICIES, ERRORS AND ESTIMATES

The Group adopted for the first time, on January 1, 2018, the new IFRS 15 - Revenue contracts and IFRS 9 - Financial Instruments, without restatement of the comparative financial statements.

3.1. IFRS 15 - Revenue contracts with clients

IFRS 15 applies to all revenue arising from contracts with customers (except for contracts covered by other standards), implying amendments to several IAS / IFRS / IFRIC / SIC and the repeal of IAS 11 and 18, IFRIC 13, 15 and 18 and SIC 31.

The main principle of the new standard is that an entity must recognize the revenue to represent the transfer to customers of promised goods or services in an amount that reflects the consideration that the entity expects to receive in exchange for such goods or services, establishing a five-step methodology for the recognition of revenue:

- Step 1 Identify the contract with the client;
- Step 2 Identify performance obligations;
- Step 3 Determine the price of the transaction;
- Step 4 Allocate the price of the transaction to its performance obligations;
- Step 5 Recognition of revenue (when a performance obligation is met).

Ibersol applied this new standard as of January 1, 2018, using the modified retrospective method, which establishes that the cumulative effect of the adoption of the standard is recognized in the results carried over to that date. The adoption of IFRS 15 did not result in any effect on the retained earnings of the Group.

The application of the methodology to contracts with clients concluded the following:

<u>Sales</u>

In restaurant and merchandise sales there is only one performance obligation, so revenue is recognized immediately, with the delivery of the goods to the customer.

In accordance with IFRIC 13, in sales situations in restaurants where customer discounts are promised to the customer through the customer loyalty program, the fair value of the benefits attributed to customers was estimated, with the recognition of the revenue being deferred until when the obligation is satisfied or expire.

Franchise Agreements

In franchise contracts, the Group has the obligation to grant the customer the right to use the brand and its operating know-how, in a certain place and for an agreed period of time, and the customer is obliged to pay a counterpart, usually translated into:

- initial entry value, corresponding to opening rights;

- monthly operating royalties, the method of calculation of which is previously defined in the contract (fixed amount previously established or amount determined periodically by applying a percentage to the value of sales made by the client);

- monthly quota for advertising purposes.

If there is an initial value of entry, it is accounted as a deferred income, so that the recognition of the respective revenue is effected throughout the life of the contract.

The recognition of the revenue corresponding to the monthly operating royalties and the monthly advertising quotas is carried out immediately, matching the fulfillment of performance obligations.

3.2 IFRS 9 - Financial instruments

IFRS 9 introduced new requirements for the classification and measurement of financial assets, financial liabilities and for some contracts for the purchase or sale of non-financial assets. This standard replaces the requirements of IAS 39.

IFRS 9 replaces the model of losses incurred in IAS 39 with an expected loss model.

The Group adopted IFRS 9 assuming the option at the time of transition by the modified retrospective approach, without restatement of comparative information.

The group applied IFRS 9 on the Angolan State Treasury Bonds (TB's), financial assets of the group.

The impact at the time of transition and in the period are shown in Note 19.

4. IMPORTANT ACCOUNTING ESTIMATES AND JUDGMENTS

There where no substantial differences between accounting estimates and judgments applied on 31 December 2017 and the accounting values considered in the six months period ended on the 30 June 2018.

(1) Due to the small size of its operations Angola is included in Portugal segment.

7. UNUSUAL AND NON-RECURRING FACTS AND SEASON ACTIVITY

No unusual facts took place during the six months period ended 30 June 2018.

In the restaurant segment season activity is characterized by lower sales in the first two quarters of the year. In addition sales for the first six months of the year are influenced by the Easter calendar as well as the pace of openings or closures of the group restaurants. The previous years have evidenced that, in comparable perimeter and with an equal distribution of openings and closings, in the period that understands the first semester of the year, sales are about 46% of annual volume.

8. TANGIBLE FIXED ASSETS

In the six months period ended 30 June 2018 and in the year ending on 31 December 2017, entries in the value of tangible fixed assets, depreciation and accumulated impairment losses were as follows:

10. INCOME PER SHARE

Income per share in the six months period ended 30 June 2018 and 2017 was calculated as follows:

	Jun/18	Jun/17
Profit payable to shareholders	10 740 667	9 500 549
Mean weighted number of ordinary shares issued (1)	36 000 000	36 000 000

	32 400 074	32 400 074
Basic earnings per share (€ per share)	0,33	0,29
Earnings diluted per share (€ per share)	0,33	0,29
Number of own shares at the end of the year	3 599 926	3 599 926

Since there are no potential voting rights, the basic earnings per share is equal to earnings diluted per share.

At the Annual General Meeting of May 14, 2018, an increase in the share capital to 36 million euros was approved by the incorporation of free reserves amounting to 6 million euros. This increase in share capital results in an increase of 599.988 own shares

11. DIVIDENDS

At the General Meeting of 14th May 2018, the company decided to pay a gross dividend of 0,10 euro per share (0,10 euro in 2017), representing a total value of 2.700.006 euro for outstanding shares (2.160.010 euro in 2017), settled on June 2018.

12. CONTINGENT ASSETS AND LIABILITIES

The group has contingent liabilities regarding bank and other guarantees and other contingencies related with its business operations (as licensing, advertising fees, food hygiene and safety and employees, and the rate of success of these processes is historically high in Ibersol). No significant liabilities are expected to arise from the said contingent liabilities.

On 30th June 2018 and 31st December 2017, responsibilities not recorded by the companies and included in the consolidation consist mainly of bank guarantees given on their behalf, as shown below:

	Jun/18	Dec/17
Bank guarantees	32 493 885	25 753 064

13. COMMITMENTS

On June 30th, 2018 there are no significant commitments for contracted investments not included in these financial statements.

14. IMPAIRMENT

15. FINANCIAL RISK MANAGEMENT

15.1 Financial risk factors

The group's activities are exposed to a number of financial risk factors: market risk (including currency exchange risk, fair value risk associated to the interest rate and price risk), credit risk, liquidity risk and cash flow risks associated to the interest rate. The group maintains a risk management program that focuses its analysis on financial markets to minimise the potential adverse effects of those risks on the group's financial performance.

Financial risk management is headed by the Financial Department based on the policies approved by the Board of Directors. The treasury identifies, evaluates and employs financial risk hedging measures in close cooperation with the group's operating units. The Board provides principles for managing the risk as a whole and policies that cover specific areas, such as the currency exchange risk, the interest rate risk, the credit risk and the investment of surplus liquidity.

a) Market risk

i) Currency exchange risk

With regard to exchange rate risk, the Group follows a natural hedge policy using financing in local currency. Since the Group is mainly present in the Iberian market, bank loans are mainly denominated in euros and the volume of purchases outside the Euro zone are of irrelevant proportions.

The main source of the Group's exposure arises from the investment outside the euro area of operation that develops in Angola, although it is still small is growing and consequently to gain weight in the group activity. The reduction of oil prices is to lead to a shortage of foreign currency in Angola by the devaluation of the kwanza is a risk to consider. The financing of the Angolan subsidiary in foreign currency in the amount of \$ 750.000, does not have large exposure due to the reduced amount. The remaining financing concerning Angolan subsidiaries are denominated in the local currency, the same in which the income is generated. Given the current limitations of payments abroad, the group adopted a monthly monitoring policy of credit balances in foreign currency and its full coverage with the acquisition of treasury bonds of the Republic of Angola, indexed to USD.

Currency exchange rate used for conversion of the transactions and balances denominated in Kwanzas, were respectively:

Jun/18

Euro exchange rates	(x	Rate on June, 30	Average inte	erest rate
foreign currency per 1 Euro)		2018	June 2018	
Kwanza de Angola (AOA)		288,850)	262,467

Dec/17

Euro exchange rates	(X	Rate on December,	Average inter	rest rate
foreign currency per 1 Euro)		31 2017	year 2017	
Kwanza de Angola (AOA)		185,391		187,441

ii) Price risk

The group is not greatly exposed to the merchandise price risk.

iii) Interest rate risk (cash flow and fair value)

With the exception of the Angola Treasury Bonds, the group has no significant interest bearing assets. Therefore, profit and cash flows from investment activities are substantially independent of changes in market interest rate. Regarding the Angolan State treasury bonds, interest is fixed, so there is also no risk.

The group's interest rate risk follows its liabilities, in particular long-term loans. Loans issued with variable rates expose the group to the cash flow risk associated to interest rates. Loans with fixed rates expose the group to the risk of the fair value associated to interest rates. At the current interest rates, in financing of longer maturity periods the group has a policy of fixing interest rates of at least 50% of the outstanding amount.

The unpaid debt bears variable interest rate, part of which has been the object of an interest rate swap. Interest rate swap contracts to hedge the interest rate risk of part of the loans (commercial paper) of EUR 32,55 million are subject to interest maturities and repayment plans identical to the terms of the loans.

Based on simulations performed on 30 June 2018, an increase of 100 basis points in the interest rate, maintaining other factors constant, would have a negative impact in the net profit of 375.000 euros (949.000 euros in December 2017).

b) Credit risk

The main activity of the Group is carried out with sales paid in cash, or debit or credit card, so the Group has no significant credit risk concentrations. Regarding the customers, the risk is limited to the Catering business and sales of merchandise to franchisees representing less than 5% of the consolidated turnover. The Group has policies to ensure that credit sales are made to customers with an appropriate credit history. The Group has policies that limit the amount of credit that customers have access to.

The Group's cash and cash equivalents include mainly deposits resulting from cash provided by sales and its deposits in current accounts. These amounts excluded, the value of financial investments at June 30, 2018, is not significant, with the exception of the above mentioned Treasury Bonds of the Republic of Angola in the amount of 21 million euro, subject to country risk.

Deposits and other financial investments are spread over several credit institutions; therefore there is not a concentration of these financial assets.

c) Liquidity risk

Liquidity risk management implies maintaining a sufficient amount of cash and bank deposits, the feasibility of consolidating the floating debt through a suitable amount of credit facilities and the capacity to liquidate market positions. Treasury needs are managed based on the annual plan that is reviewed every quarter and adjusted daily. Related with the dynamics of the underlying business operations, the group's treasury strives to maintain the floating debt flexible by maintaining credit lines available.

The Group considers that the short-term bank loans are due on the renewal date and that the commercial paper programmes matured on the dates of denunciation.

At the end of the period, current liabilities reached 132 million euros, compared with 77 million euros in current assets. This disequilibrium is, on one hand, a financial characteristic of this business and, on the other hand, due to

the use of commercial paper programmes in witch the Group considers the maturity date as the renewal date, regardless of its initial stated periods. In order to ensure liquidity of the short term debt it is expected in the year 2018 the renewal of the commercial paper programmes (10.000.000 euros). However, the expected operating cash flows and, if necessary, contracted credit lines, on the amounts of which have not yet been used, are sufficient to settle current liabilities.

Even with reduced use of the group has contracted a significant amount of short-term lines. On June 30, 2018, the use of short term liquidity cash flow support was about 0,7%. Investments in term deposits and other application of 47 million euros, match 34% of liabilities paid.

The following table shows the Group financial liabilities (relevant items), considering contractual cash-flows:

-	to June 2019	from June 2019 to 2028
Bank loans and overdrafts	42 445 508	94 259 897
Other non-current liabilities Accounts payable to suppliers and	-	164 768

Other current liabilities	5 537 639	-
Total	108 829 037	94 833 005

15.2 Capital risk

a) Gearing ratio

The company aims to maintain an equity level suitable to the characteristics of its main business (cash sales and credit from suppliers) and to ensure continuity and expansion.

The capital structure balance is monitored based on the gearing ratio (defined as: net remunerated debt / net remunerated debt + equity) in order to place the ratio within a 35%-70% interval.

On 30th June 2018 and 31st December 2017 the gearing ratio was of 29% and 31%, respectively, as follows:

	-	jun/18	Dec-17
Bank loans		136 705 405	141 014 741
Other financial assets		-20 957 813	-22 986 661
Cash and bank deposits		-37 281 236	-34 902 883
Net indebtedness	-	78 466 356	83 125 197
Equity		191 877 244	188 620 193
Total capital		270 343 600	271 745 390
	Gearing ratio	29%	31%

b) Risk of franchise agreements

In restaurants where it operates with international brands, the group enters into long-term franchise agreements: 20 years in the case of Burger King and 10 years in the case of Pizza Hut and KFC, which are renewable for another 10 years at the franchise's option, provided certain obligations have been fulfilled.

It has become practical for these contracts to be renewed. However, nothing obliges the franchisees to do so, so the risk of non-renewal may be verified.

In these contracts it is normal to contract the payment of an "Initial Fee" at the beginning of each contract and a "Renewall Fee" at the end of the initial period, in addition to a royalty of marketing operations on the sales made.

Periodically, development contracts are negotiated which guarantee the right to open new restaurants.

At the moment a contract has been signed for the implementation of 40 KFC restaurants in the period between May 2017 and May 2022.

15.3 Estimated fair value

The fair value of financial instruments commercialised in active markets (such as publicly negotiated derivatives, securities for negotiation and available for sale) is determined based on the listed market prices on the consolidated statement of financial position date. The market price used for the group's financial assets is the price received by the shareholders in the current market. The market price for financial liabilities is the price to be paid in the current market.

The nominal value of accounts receivable (minus impairment adjustments) and accounts payable is assumed to be as approximate to its fair value. The fair value of financial liabilities is estimated by updating future cash flows contracted at the current market interest rate that is available for similar financial instruments.

21. IFRS STANDARDS ALREADY ISSUED OR REVIEWED AND FOR FUTURE APPLICATION

1) Standards (new and amendments) that have been published and are mandatory for the accounting periods beginning on or after 1 January 2018, endorsed by the EU:

a) IFRS 16 (new), 'Leases' (effective for annual periods beginning on or after 1 January 2019). This new standard replaces the IAS 17 with a significant impact on the accounting by lessees that are now required to recognise a lease liability reflecting future lease payments and a "right-of-use asset" for all lease contracts, except for certain short-term leases and for low-value assets. The definition of a lease contract also changed, being based on the "right to control the use of an identified asset". It is estimated that its application has relevant impacts, Ibersol will determine the respective amounts.

b) IFRS 4 (amendment), 'Insurance contracts (Applying IFRS 4 with IFRS 9)' transactions' (effective for annual periods beginning on or after 1 January 2018). This amendment allows companies that issue insurance contracts the option to recognise in Other Comprehensive Income, rather than Profit or Loss the volatility that could rise when IFRS 9 is applied before the new insurance contract standard is issued. Additionally, it is given an optional temporary exemption from applying IFRS 9 until 2021, to the companies whose activities are predominantly connected with insurance, not being applicable at consolidated level. It is not expected that its application has significant impacts.

c) Amendments to IFRS 15 'Revenue from contracts with customers' (effective for annual periods beginning on or after 1 January 2018). These amendments refer to additional guidance for determining the performance obligations in a contract, the timing of revenue recognition from a license of intellectual property, the review of the indicators for principal versus agent classification, and to new practical expedients to simplify transition. It is not expected that its application has significant impacts.

2) Standards (new and amendments) and interpretations that have been published and are mandatory for the accounting periods beginning on or after 1 January 2017, but are not yet endorsed by the EU:

Standards

a) Annual Improvements 2014 - 2016, (generally effective for annual periods beginning on or after 1 January 2017). The 2014-2016 annual improvements impacts: IFRS 1, IFRS 12 and IAS 28. It is not expected that its application has significant impacts.

b) IAS 40 (amendment), 'Transfers of Investment property' (effective for annual periods beginning on or after 1 January 2018). This amendment is still subject to endorsement by the European Union. This amendment clarifies when assets are transferred to, or from investment properties, the evidence of the change in use is required. A change of management intention in isolation is not enough to support a transfer. It is not expected that its application has significant impacts.

c) IFRS 2 (amendment), 'Classification and measurement of share-based payment transactions' (effective for annual periods beginning on or after 1 January 2018). This amendment is still subject to endorsement by the European Union. This amendment clarifies the measurement basis for cash-settled, share-based payments and the accounting for modifications to a share-based payment plan that change the classification an award from cash-settled to equity-settled. It also introduces an exception to the principles in IFRS 2 that will require an award to be treated as if it was wholly equity-settled, where an employer is obliged to withhold an amount for the employee's tax obligation associated with a share-based payment and pay that amount to the tax authority. It is not expected that its application has significant impacts.

d) IFRS 9 (amendment), 'Prepayment features with negative compensation' (effective for annual periods beginning on or after 1 January 2019). This amendment is still subject to endorsement by the European Union. The amendment introduces the possibility to classify certain financial assets with negative compensation features at amortized cost, provided that specific conditions are fulfilled, instead of being classified at fair value through profit or loss. It is not expected that its application has significant impacts.

e) IAS 28 (amendment), 'Long-term interests in Associates and Joint Ventures' (effective for annual periods beginning on or after 1 January 2019). This amendment is still subject to endorsement by the European Union. The amendment clarifies that long-term investments in associates and joint ventures (components of an entity's investments in associates and joint ventures), that are not being measured through the equity method, are to be measured in accordance with IFRS 9, being subject to impairment expected credit loss model, prior to any impairment test of the investment as a whole. It is not expected that its application has significant impacts.

f) Annual Improvements 2015 - 2017, (generally effective for annual periods beginning on or after 1 January 2019). These improvements are still subject to endorsement by the European Union. The 2015-2017 annual improvements impact: IAS 23, IAS 12, IFRS 3 and IFRS 11. It is not expected that its application has significant impacts.

g) IFRS 17 (new), 'Insurance contracts' (effective for annual periods beginning on or after 1 January 2021). This standard is still subject to endorsement by European Union. This new standard replaces IFRS 4 and applies to all entities issuing insurance contracts, reinsurance contracts and investment contracts with discretionary participation characteristics. IFRS 17 is based on the current measurement of technical liabilities at each reporting date. The current measurement can be based on a complete "building block approach" or "premium allocation approach". The recognition of the technical margin is different depending on whether it is positive or negative. IFRS 17 is of retrospective application. It is not expected that its application has significant impacts.

Interpretation

a) IFRIC 22 (new), 'Foreign currency transactions and advance consideration' (effective for annual periods beginning on or after 1 January 2018). This interpretation is still subject to endorsement by European Union. An Interpretation of IAS 21 'The effects of changes in foreign exchange rates' it refers to the determination of the "date of transaction" when an entity either pays or receives consideration in advance for foreign currency denominated contracts". The date of transaction determines the exchange rate used to translate the foreign currency transactions. It is not expected that its application has significant impacts.

b) IFRIC 23 (new), 'Uncertainty over income tax treatment' (effective for annual periods beginning on or after 1 January 2019). This interpretation is still subject to endorsement by European Union. This is an interpretation of IAS 12 - 'Income tax', referring to the measurement and recognition requirements to be applied when there is uncertainty as to the acceptance of an income tax treatment by the tax authorities. In the event of uncertainty as to

the position of the tax authority on a specific transaction, the entity shall make its best estimate and record the income tax assets or liabilities under IAS 12, and not under IAS 37 - "Provisions, contingent liabilities and contingent assets ", based on the expected value or the most probable value. The application of IFRIC 23 may be retrospective or retrospective modified. It is not expected that its application has significant impacts.

22. SUBSEQUENT EVENTS

There are no subsequent events to 30th June 2018 that may have a material impact on the financial statements presented.

23. APPROVAL OF THE FINANCIAL STATEMENTS

LIMITED REVIEW REPORT ON INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(This report is a free translation to English from the original Portuguese version. In case of doubt or misinterpretation the Portuguese version will prevail.)

Introduction

We have performed a limited review of the accompanying interim consolidated financial statements of **Ibersol SGPS, S.A.**, (**the Entity**), which comprise the interim consolidated statement of financial position as of 30 June 2018 (that presents a total of 431,757,549 euros and total equity attributable to the shareholders of 191,472,785 euros, including a consolidated net profit attributable to the shareholders of 10,740,667 euros), the interim consolidated statements of income and other comprehensive income, changes in equity and cash flows for the six month period then ended, and the accompanying condensed explanatory notes to these interim consolidated financial statements.

Management' responsibilities

The management is responsible for the preparation of this interim consolidated financial statements in accordance with IAS 34 – Interim Financial Reporting as adopted by the European Union, and for the implementation and maintenance of an appropriate internal control system to enable the preparation of interim consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibilities

Our responsibility is to express a conclusion on the accompanying interim consolidated financial statements. Our work was performed in accordance with the international standards on review engagements and further technical and ethical standards and guidelines issued by the Portuguese Institute of Statutory Auditors ("Ordem dos Revisores Oficiais de Contas"). These standards require that we conduct the review in order to conclude whether anything has come to our attention that causes us to believe that the interim consolidated financial statements are not prepared in all material respects in accordance with the IAS 34 – Interim Financial Reporting as adopted by the European Union.

A limited review of interim consolidated financial statements is a limited assurance engagement. The procedures that we have performed consist mainly of making inquiries and applying analytical procedures and subsequent assessment of the evidence obtained. The procedures performed in a limited review are substantially less that those performed in an audit conducted in accordance with International Standards on Auditing (ISA). Accordingly, we do not express an audit opinion on these interim consolidated financial statements.

Conclusion

Based on the work performed, nothing has come to our attention that causes us to believe that the interim accompanying consolidated financial statements of **Ibersol SGPS, S.A.**, on 30 June 2018, are not prepared, in all material respects, in accordance with the IAS 34 – Interim Financial Reporting as adopted by the European Union.

Other matter

The interim consolidated financial statements of the Entity, for the six month period ended 30 June 2017 and for the year ended 31 December 2017 have been reviewed and audited by another statutory auditor that has issued a review report and a statutory audit report, respectively, without qualifications or emphasis of matters on the corresponding consolidated financial statements on 31 August 2017 and 9 April 2018, respectively. Our nomination as statutory auditors has taken place on 30 May 2018 to perform the statutory audit for the year ended 31 December 2018.
