

The net realisation value corresponds to the estimated sale price during normal business operations, minus variable sale costs.

#### 2.10. Accounts receivable from clients and other debtors

Accounts receivable from clients and other debtors are initially recognised at the fair value. Medium and long term debts are subsequently measured at the amortised cost, using the effective rate method minus the impairment adjustment. The impairment adjustment of accounts receivable is determined when there is objective evidence that the group will not receive all the owed amounts according to the original conditions of the accounts receivable. The impairment adjustment value is the difference between the presented value and the current estimated value of future cash flows, discounted at the effective interest rate. The impairment adjustment value is recognised in the consolidated statement of comprehensive income.

#### 2.11. Cash and cash equivalents

Cash and cash equivalents include cash amounts, bank deposits, other short term investments with high liquidity and initial maturities of up to 3 months and bank overdrafts. Bank overdrafts are presented in the consolidated statement of financial position, in current liabilities, in the Obtained Loans item.

#### 2.12. Share capital

Ordinary shares are classified in equity.

Incremental costs directly attributable to the emission of new shares or options are presented in equity as a deduction, net of taxes, of entries.

When any group company acquires shares in the parent company (own shares), the amount paid, including costs directly attributable (net of taxes), is deducted from the equity attributable to the shareholders of the parent company until the shares are cancelled, re-issued or sold. When those shares are subsequently sold or re-issued and after deducting directly imputable transaction costs and taxes, any receipt is included in the equity of the company's shareholders.

#### 2.13. Loans obtained

Loans obtained are initially recognised at the fair value, including incurred transaction costs. Medium and long term loans are subsequently presented at cost minus any amortisation; any difference between receipts (net of transaction costs) and the amortised value is recognised in the consolidated statement of comprehensive income during the loan period, using the effective rate method.

Loans obtained are classified in current liabilities, except when the group is entitled to
