

loss is recognised in the consolidated statement of comprehensive income by the amount by which the recoverable amount exceeds the accounted amount. The recoverable amount is the highest amount between an asset's fair value minus the costs necessary for its sale and its utilisation value. To perform impairment tests, assets are grouped at the lowest level at which it may be able to separately identify cash flows (units generating cash flows).

A cash-generating unit (CGU) is the smallest group of assets which includes the asset and that generates cash flows from continued use and which is generally independent from the cash input from other assets or asset groups. In the case of tangible assets, each shop was identified as a cash-generating unit. Shops with negative Ebitda for at least 2 years are subject to impairment tests.

Consolidation differences are distributed among the group's cash-flow generating units (CGUs), identified according to the country of operation and the business segment.

The recoverable value of a CGU is determined based on calculating the utilisation value. Those calculations apply cash flow forecasts based on financial budgets approved by the managers and cover a 5-year period.

The Board of Directors determines the budgeted gross margin based on past performance and on its market growth expectations. The average weighted growth rate used is consistent with provisions included in the sector's reports. The discount rates used after taxes and reflect specific risks related with the assets from a CGU.

2.8 FINANCIAL ASSETS

2.8.1 Classification

The group classifies its financial assets under the following categories: financial assets at the fair value through results, loans granted and accounts receivable, investments held until maturity and financial assets available for sale. The investment is classified according to its purpose. The Board of Directors decides on the classification when the investments are initially recorded and re-assesses that classification at each report date.

a) Financial assets at the fair value through results

This category is subdivided into two parts: financial assets held for negotiation and those that are designated at the fair value through results from the start. A financial asset is classified in this category if it is acquired for the main purpose of being sold on the short term or if designated as such by the Board of Directors. Derivatives are also classified as held for negotiation, except if they are classified for hedging. Assets in this category are classified as current if they are held for negotiation or are realisable within 12 months after the consolidated statement of financial position date.

b) Loans granted and accounts

Loans granted and other credits are non-derivative financial assets with fixed or determinable payments and that are not listed on an active market. These assets originate when the group supplies cash, goods or services directly to a debtor, without intending to negotiate the time at which it will receive payment for the said cash goods or services. They are included in current assets, except when they mature in more than 12 months after the consolidated statement of financial position date, in which case they are classified as non-current assets.
